

# NATURAL COSMETICS AND ACCESSORIES

**MADE FROM HERBS  
AND ESSENTIAL OILS**

## **HANDMADE WITH LOVE**

Our products are handmade from the core ingredients like organic herbs, natural oils and essential oils.

## **BOTANIC GARDEN – SINCE 2015**

We actively employ Ayurveda for the formulation and production of our beauty products. We see them not as cosmetics, but as food for skin and body. Our know-how is a reimagining of traditional Ayurvedic recipes, and adapting them to the use of plants and leaves from the European geographic zone, so that they will work with our body and skin types in the most holistic way.

# Cleansing Compositions

## CLEANER THAN CLEAN

For the everyday cleansing of the skin Ayurveda uses compositions based on the flour from different ground cereals, spices and herbs. From the Ayurvedic perspective it is very important that skincare products are edible and do not contain toxic and carcinogenic substances – since skin absorbs everything we put over it. When choosing a composition pick one that suits your skin type: dry, sensitive or oily.

# Hydrolats

## WATER IS FOR LIVING

Hydrolats are the “floral waters” made by steam distillation of plant materials, petals or leaves. So hydrolats are blend of water and water soluble essential oils of the plant. Hydrolats are slightly acidic in nature, and are great for skin moisturising. Skin is naturally slightly acidic, usage of hydrolats helps to protect and balance skin’s acid mantle.

# Massage Candles

## CELEBRATE YOUR SENSES

A blend of jojoba, almond and natural essential oils with soy wax provides perfect massage experience. When the candle is lit, oils liquify. Once the flame is put out, the blend of still warm melted oils is applied to the skin (shoulders, neck, legs) relieving stress and providing relaxation. Oils get absorbed by skin leaving it nourished, polished and silky.

# Home Perfumes

## SO VERY AROMATHERAPEUTIC

Our fragrances are made with the natural essential oils. Why do we prefer using the natural ones? The answer is simple: the sense of smell is much sharper than, for example, the senses of taste and touch.

When we breathe in a favourite scent it directly stimulates the brain's limbic system – the set of structures which are responsible for desires, emotions, focus, memory, vitality. That is why we believe that the source of sensory stimulation must be as clean, natural and full of life as possible.

# Herbal Mats

This herbal mat is hand-woven from herbs and plants. It is the coolest re-usable sauna accessory. All you need to do is to spray it with warm water while you are in the steam room. Birch, willow, carex, raspberry leaves are great herbs to breathe in while in sauna, they relieve stress and anxiety, cleanse your body, purify and energize. Your body skin will absorb plants' oils and juices while you'll be lying on the mat. Mat should be dried up after sauna use, it can be used repeatedly during 6 months.

Plants and herbs for sauna mats are gathered shortly before midsummer, because then they reach their full height, strength, flavour and appearance – helping to turn mats into a nice sauna accessory, but also into an appealing design object.

The mats are woven with the loom just as other traditional fabric would have been made. The difference is in threads, that are chosen specially for this purpose and of course in the technique of weaving.

HERBAL MAT FOR SAUNA

Ingredients: Birch, Willow, Carex, Raspberry Leaves.

€47

Size: 70 cm x 150 cm.
